TechNova Solutions Pvt. Ltd.

VPN & Laptop Setup Guide

Version 1.0 | Effective Date: August 2026

Who Is This For?

Full-Time Employees, Contract Staff, Interns & Consultants with company-issued devices

What Does It Cover?

Laptop setup, corporate application access, VPN configuration, and IT security best practices

When To Use It

During onboarding — before your first day of work on company systems

Made with GAMMA

PAGE 1 — Purpose & Before You Begin

This guide helps new employees set up their company-issued laptop, access corporate applications, configure the VPN, and follow IT security best practices during onboarding.

This Guide Applies To

- Full-Time Employees
- Contract Employees
- Interns
- Consultants with company-issued devices

Before You Begin — Ensure You Have Received

- Company Laptop
- Laptop Charger
- Welcome Email
- Employee ID
- Temporary Password
- Microsoft 365 Credentials
- VPN Credentials
- MFA Setup Instructions

Made with GAMMA

PAGE 2 — Laptop Setup

Step 1 – Unbox Your Laptop

Verify that you have received all of the following items. If any are missing, contact the IT Helpdesk immediately.

- Laptop
- Charger
- Laptop Bag (if provided)
- User Guide
- Asset Tag

Step 2 – Power On

01

Connect the charger

02

Press the Power button

03

Connect to a stable internet connection

04

Allow Windows to complete initial configuration

Step 3 – First Login

Log in using the credentials provided in your Welcome Email.

Username Format

`firstname.lastname@technovasolutions.com`

Example

`john.smith@technovasolutions.com`

Use the temporary password provided by IT. You will be prompted to create a new password during your first login.

Password Requirements

- At least **12 characters**
- Include **uppercase and lowercase** letters
- Include at least **one number**
- Include at least **one special character**
- Must **not** contain your name or employee ID

PAGE 3 — Company Applications

After logging in, install or verify access to the following applications:

Microsoft Outlook
Company Email

Microsoft Teams
Communication & Meetings

Microsoft OneDrive
Cloud File Storage

Jira
Project Management

Confluence
Internal Documentation

GitHub Enterprise
Source Code Repository

Microsoft Authenticator
Multi-Factor Authentication

Company VPN Client
Secure Remote Access

Microsoft Teams — Use For

- Chat
- Meetings & Video Calls
- Team Collaboration
- File Sharing

Keep your Teams status updated during working hours.

Outlook Email — Best Practices

Use Outlook for all official business communication. Employees should:

- Check email regularly
- Avoid opening suspicious attachments
- Report phishing emails using the Outlook reporting feature

Made with GAMMA

PAGE 4 – VPN Setup

VPN is **mandatory** whenever accessing company systems outside the office. The VPN provides a secure encrypted connection between your device and TechNova's internal network.

VPN Configuration Steps

1. Open the company VPN Client
2. Enter your company email address
3. Enter your password
4. Approve the MFA request
5. Click Connect

Once Connected, You Can Access

- Shared Drives
- Internal Applications
- HRMS Portal
- Development Servers
- Internal Documentation
- GitHub Enterprise
- Project Resources

VPN Troubleshooting

If you cannot connect:

- Check your internet connection
- Verify your username and password
- Confirm that MFA approval was completed
- Restart the VPN client
- Restart your laptop if the issue persists
- Contact the IT Helpdesk if still unable to connect

Made with GAMMA

PAGE 5 — Security Best Practices

Employees Must

- Lock their laptop whenever leaving their desk
- Enable automatic screen lock after inactivity
- Never share passwords
- Never allow family or friends to use company devices
- Install updates when prompted
- Store company files only in approved cloud storage
- Connect only to trusted Wi-Fi networks
- Use the VPN whenever working remotely

Lost or Stolen Devices

Employees should report lost devices **within one hour** of discovery.

01

Inform the IT Helpdesk immediately

02

Notify your Reporting Manager

03

Change your password if instructed

04

File a police complaint if required

05

Cooperate with the IT Security Team during investigation

Software Requests

Only approved software may be installed on company devices.

1. Log in to the IT Service Portal
2. Select **Software Request**
3. Choose the required application
4. Provide a business justification
5. Submit for manager approval

PAGE 6 — Frequently Asked Questions

Q. What should I do if I forget my laptop password?

Use the Self-Service Password Reset portal or contact the IT Helpdesk for assistance.

Q. How do I install Microsoft Teams?

Microsoft Teams is included in the company software package. If it is missing, submit a Software Request through the IT Service Portal.

Q. Can I use my personal laptop?

No. Employees must use company-issued devices unless written approval is provided by the IT Department.

Q. What should I do if my laptop is lost or stolen?

Report the incident immediately to the IT Helpdesk and your Reporting Manager. Follow any instructions provided by the IT Security Team.

Q. What applications should be installed on my laptop?

Employees should have access to Microsoft Outlook, Microsoft Teams, OneDrive, Jira, Confluence, GitHub Enterprise, Microsoft Authenticator, and the company VPN client.

Q. Is VPN required while working from home?

Yes. Employees must use the company VPN whenever accessing internal systems outside the office network.

Q. What should I do if my VPN won't connect?

Verify your internet connection, confirm your credentials, approve the MFA request, restart the VPN client, and contact the IT Helpdesk if the issue continues.

Q. How do I request additional software?

Submit a Software Request through the IT Service Portal with your business justification. Manager approval may be required.

Q. How do I access the HRMS Portal?

Connect to the company VPN (if working remotely), open the HRMS Portal using your browser, and sign in with your company credentials.

Q. Who should I contact for technical issues?

Contact the IT Helpdesk through the IT Service Portal, official helpdesk email, or internal extension during support hours.
